

RELEASE-RITE[®] 2100

Rubber Release Agent

RELEASE-RITE[®] 2100 is an aqueous semi-permanent rubber release agent intended for the most general rubber molding operations. This product is the first choice for all rubber molding operations as the product provides a uniform coating that is tough and durable and improves rubber flow in most typical applications.

Features

- Multiple releases with one application
- Highly Durable Film
- Outstanding cosmetics
- Ready to use
- First choice for rubber molding

Typical Properties

Appearance:	Off White Fluid
Odor:	Mild
Flash Point:	None

Application

This product is designed to be used as received.

1. Thoroughly clean mold surface.
2. A light spray application is best, while wiping with a cotton cloth or brush application can also be used.
3. Spray apply three light coats to mold surface allowing the film to dry before applying the next coat.
4. Allow film to fully cure at least 5 minutes before resuming molding operations.
5. Reapply as needed using one light coat curing at least one minute before molding resumes.

A qualified Cross Chemical representative will be happy to assist you in determining the proper use and application of our products.
