

RELEASE-RITE[®] 2150

Rubber Release Agent

RELEASE-RITE[®] 2150 is an aqueous semi-permanent rubber release agent intended for the most general rubber molding operations. This product also contains an enhanced slip package which improves part fill for those rubber compounds with poor flow characteristics. The product also improves demolding and prevents sticking with the low coefficient of friction compared to typical rubber release agents.

Features

- Multiple releases with one application
- Highly Durable Film
- Low coefficient of friction
- Outstanding cosmetics
- Ready to use
- First choice for difficult to mold rubber

Typical Properties

Appearance:	Off White Fluid
Odor:	Mild
Flash Point:	None

Application

This product is designed to be used as received.

1. Thoroughly clean mold surface.
2. A light spray application is best, while wiping with a cotton cloth or brush application can also be used.
3. Spray apply three light coats to mold surface allowing the film to dry before applying the next coat.
4. Allow film to fully cure at least 5 minutes before resuming molding operations.
5. Reapply as needed using one light coat curing at least one minute before molding resumes.

A qualified Cross Chemical representative will be happy to assist you in determining the proper use and application of our products.

Handling & Storage

Containers:	5gal (18 liters), 55gal (207 liters) and tote quantities available.
Shelf Life:	1 year under original seal, unopened containers.
Disposal:	Dispose of product appropriately, following all federal, state, and local regulations.
Freezing:	Do not freeze.
Safety & Health:	Refer to the product Material Safety Data Sheet (MSDS).
