

RELEASE-RITE[®] 2700

Sacrificial Release Agent

RELEASE-RITE[®] 2700 is a water based release agent intended for all types of molding operations. The product is designed to be sprayed every cycle and provides exceptional release and lubrication for most plastics and rubber compounds. Can be used to release a wide variety of thermoset and thermoplastic polymers but it is exceptional for epoxy, FRP, rubber and polyurethane applications. This product provides a uniform coating that is tough and durable and improves flow and provides high slip in most typical applications.

Features

- Consistent release
- Highly slip and lubrication
- Outstanding cosmetics
- Excellent for Rubber, Polyurethane, FRP and epoxy molding

Typical Properties

Appearance:	White Fluid
Odor:	Mild
Flash Point:	None

Application

This product is can be diluted with water up to 1:5 (1 part concentrate, X parts water).

1. Thoroughly clean mold surface.
2. A light spray application is best, while wiping with a cotton cloth or brush application can also be used.
3. Spray apply a light coating of product to mold surface allowing the film to dry before molding.
4. Reapply for each cycle.

A qualified Cross Chemical representative will be happy to assist you in determining the proper use and application of our products.

Handling & Storage

Containers:	5gal (18 liters), 55gal (207 liters) and tote quantities available.
Shelf Life:	1 year under original seal, unopened containers.
Disposal:	Dispose of product appropriately, following all federal, state, and local regulations.
Freezing:	Do not freeze.
Safety & Health:	Refer to the product Material Safety Data Sheet (MSDS).
